25 Who Framed Roger Rabbit

A key moment in the creation of *Who Framed Roger Rabbit* came when director Robert Zemeckis and animation director Richard Williams decided that films that mix animation and live-action *don't* work. Noted animation historian Charles Solomon explores how their solution to mixing the two mediums led to the biggest hit of 1988. Plus a look at the challenges of animating classic characters—and Roger Rabbit's starlit future.

20 Paul Simon: Solo

"I think good songs are about sound," says singer/songwriter Paul Simon. From "The Sounds of Silence" to his recent album *Graceland*, Simon's genius for melody and lyrics has marked him as one of the great music legends of our time. Rock critic and historian Dave Marsh looks at Simon's phenomenal career—and an extraordinary Disney Channel special.

'60s MUSIC FANS

I really love *Ready Steady Go!* If the show originally ran for four and a half years, I can't help but think there is much more footage available. Has there been any thought to making it a series on The Disney Channel? On the "B" side, there is too much of Dave Clark, the editing is spotty, and playing half a song by a performing artist (not a number by the dancers) is disappointing.

Mark Smith Crofton, MD

I really appreciate The Disney Channel airing *Ready Steady Go!* I am a big fan of '60s music, especially the Dave Clark Five. I would like to know if there is an address to write to Dave Clark. I'd like to know whatever became of the band members, and if there are any reunion plans. Thanks again for bringing back that great music.

George Henry Lower Burrell, PA In regards to Mark Smith's letter, Ready Steady Go! will receive an encore presentation in the near future. As for George Henry and the many other subscribers who wrote in requesting Dave Clark's address, please send correspondence care of The Disney Channel. All correspondence will be forwarded to Dave Clark Productions

A BELOVED FAMILY FILM RETURNS

Do you plan to air *Rodgers and Hammerstein's Cinderella* again? My three-year-old daughter loves Cinderella and The Disney Channel. I hope her wish to see this

movie will come true soon. We'll be watching eagerly!

Julie Brahm Niantic, CT

Rodgers and Hammerstein's Cinderella, starring Lesley Ann Warren and Stuart Damon, returns to The Disney Channel in June. You'll find a synopsis and a complete listing of playdates on page 40.

EDITOR'S NOTE

You'll notice some changes in this issue of The Disney Channel Magazine. In addition to creating a new look for our regular departments, we're introducing a new column, "Now Playing," which takes the place of "Disney Beat" and "Disney Night Time." "Now Playing" profiles the people and the programs appearing on The Disney Channel, as well as reporting on upcoming programming events. We've also reorganized the lineup of our programming guide in a manner that we believe makes it easier to use and more informative. We hope you enjoy the new look of The Disney Channel Magazine.

SPOONER SCORES BIG

It is indeed a rare thing for me to write a TV channel to thank them for showing any particular program. However, I did want say that your movie *Spooner* was excellent. The whole cast was well chosen but we, of course,

particularly enjoyed Robert Urich's performance.

HATS OFF TO KEVIN SULLIVAN

We've been Disney Channel subscribers for a few years now. We subscribed to watch *Anne of Green Gables* and are thrilled you repeated it. We've been following Kevin Sullivan's films—like *Looking for Miracles*—on your station (*Lantern Hill* was also wonderful). Can't wait to see *Avonlea*!

Mary Rastler Gleneden Beach, OR Avonlea, which premiered in March, continues to air on Monday evenings at 8:00 p.m. (Eastern/Pacific time).

HESTON IN A DISNEY CHANNEL PREMIERE FILM

I am a fan of the actor Charlton Heston. Recently I heard Mr. Heston remark that he was making a film called *The Little Kidnappers* for The Disney Channel. I would appreciate it if you could provide me with any information on Mr. Heston's project.

Marcus Matthew Bocchino Hillsdale, NJ

Charlton Heston is indeed appearing in The Little Kidnappers, a Disney Channel Premiere Film scheduled to debut in August. You'll find a short interview with Heston on page 16 of our new column "Now Playing." An indepth interview with Heston will appear in the next issue.

Disney Facts OUR READERS WANT TO KNOW

Do the boxes for the video cassettes of the Disney animated classics utilize artwork from the original theater lobby posters?

-D.D., Pinole, CA

In all cases, the video boxes for the Disney animated classics feature new artwork. In fact, new poster art is usually prepared each time the films are released. Poster styles and tastes have changed over the years; what may have been eye-catching in 1940 is not necessarily so in 1990.

How many True-Life Adventures did Walt Disney make? Who was the narrator for the series?

—J.P., Red Lion, PA

There were 13 True-Life Adventures in the award-winning nature series released between 1948 and 1960. Seven of the films were featurettes and six were full-length features. Eight of these films won Oscars for Best Documentary. The narrator, veteran Disney writer Winston Hibler, later became a Disney producer. He died in 1976.

Remembering Walt A LOVE AFFAIR WITH TRAINS

Walt Disney had a life-long love of trains. As a boy in Marceline, Missouri, he used to wave to his uncle, a railroad engineer. He even worked for a while as a news "butcher," selling magazines and newspapers to train passengers. With his success in Hollywood, Walt had a steam railroad set up in the backyard of his home in Holmby Hills. This scale model train was large enough to ride on, and even went over a trestle and through a tunnel under Mrs. Disney's garden. Because of this long-standing love affair with the iron horse, Walt insisted that a train be a prominent part of Disneyland, encircling the perimeter of the Magic Kingdom.

The narrator's voice for *Peter* and the Wolf sounded so familiar; who was it?

—B.M., San Luis Obispo, CA
The narrator was Sterling Holloway. He did the voices for many
Disney characters (among them
the Cheshire Cat and Winnie the
Pooh), so it is no wonder you recognized the voice.

Didn't Kurt Russell have a brother who acted in several Disney films?

—J.K., Springfield, IL

I think you must be referring to
Bryan Russell, who was not related to Kurt. Bryan was featured
in Babes in Toyland, Emil and the
Detectives, The Adventures of Bullwhip Griffin, and on television in
Gallegher and Kilroy.

The boy who played D.B. in Spooner looks a lot like Tommy Kirk; is he related?

—M.R., USAF Academy, CO D.B. was played by Keith Coogan. Keith is the grandson of actor Jackie Coogan. He also starred recently in Disney's Cheetah and Adventures in Babysitting, and under the name of Keith Mitchell did the voice of the young Tod in The Fox and the Hound. He is not related to Tommy Kirk.

Can you tell me about Felix Salten, who wrote *Bambi*?

-S.L., Provo, UT

Salten was born in Budapest in 1869, but educated in Vienna. He wrote several adult novels and plays, but is best known for *Bambi*, first published in English in 1928.

Disney later adapted his *Perri* for the screen. Most fans of the classic comedy, *The Shaggy Dog*, do not realize that it also is from a Salten story, *The Hound of Florence*. Felix Salten died in Switzerland in 1945, not having lived long enough to see the Disney adaptations of two of his books.

Pisneyland Trivia FRONTIERLAND

- •While Walt originally insisted that Frontierland have burros and horses to give it the proper western atmosphere, after a few years he had to back off. Burros are notoriously ornery and liked to nip at the guests. Horses pulling the stage coach were occasionally spooked by the whistle of the train circling the park, causing a few minor accidents.
- The original Golden Horseshoe Revue starred Donald Novis, Judy Marsh, and Wally Boag. By the time it had its last performance on October 12, 1986, it had run for over 31 years, ensuring itself a

place in the *Guinness Book of World Records*. While the cast changed over the years (with Betty Taylor in the cast for 30 years, Wally Boag for 17, and Fulton Burley for 25), the corny jokes and enduring songs continued to endear the show to guests. The original show was replaced by a new western-themed variety show in 1986.

Judy Marsh with guest star Ed Wynn at The Golden Horseshoe Revue.

• Don DeFore, of the old *Ozzie* and *Harriet* TV show, operated Don DeFore's Silver Banjo, a barbecue restaurant in Frontierland, from 1957 to 1961.

Disney Channel Trivia FROM STRAUSS TO SNOW WHITF

- •The Waltz King (see page 41) was filmed on location in Europe, utilizing some of the continent's most ornate concert halls for its settings. The film, originally released on TV in the U.S. and in theaters in Europe, followed a year after another film depicting the life of a great composer—The Magnificent Rebel (Ludwig van Beethoven).
- This year, Disney is celebrating the 50th anniversary of its studio in Burbank. The studio was built with the profits from *Snow White* and the Seven Dwarfs after Walt and his staff had run out of space at the former studio location on Hyperion Avenue in Hollywood.
- The 1965 comedy *That Darn Cat!* (page 40) was Hayley Mills's last Disney theatrical film. One of her co-stars, Roddy McDowall, also appears on The Disney Channel in the title role of *The Adventures of Bullwhip Griffin*, a Gold Rush spoof (page 41).

Disneyland's Mark Twain paddle wheeler was christened on opening day by actress Irene Dunne. The first of its type built in the U.S. in 50 years, the riverboat is accurate in every detail, though built to 5/8 scale. It weighs 150 tons and is designed to carry 300 passengers.

Most of the sounds for the Disney cartoons and animated classics were created by sound effects wizard Jimmy Macdonald. Though Macdonald is now retired, many of the contraptions that he used to create his effects are on display at the Monster Sound Show at The Disney-MGM Studios Theme Park in Florida.

NEWS FROM THE WORLD OF DISNEY

This January, Michael Eisner, chairman of The Walt Disney Company, promised at the rededication of Disneyland that the 1990s would mark a new Disney decade. Among the plans upcoming are extensions and new attractions at Disneyland and Walt Disney World Resort. Every issue in this space we'll be keeping Disney Channel subscribers up to date on developments at the Theme Parks-and in other areas of The Walt Disney Company.

For this issue, the spot-

light turns to Walt Disney World Resort. Visitors to Walt Disney World this summer can look forward to a number of major new events. Chief among them is the world premiere, on June 14 at Pleasure Island, of Dick Tracy, starring Warren Beatty and Madonna. At The Disney-MGM Studios, a Dick Tracy Stage Show debuts May 21. But that's not all. Beginning May 25 at the Studios Tour Theme Park it's Here Come the Muppets, a stage show starring Jim Henson's beloved creatures. That's just

the start of Muppet-mania: *The Muppets on Location* begins June 9 on Hollywood Boulevard at The Chinese Theater.

An exciting new attraction is also under development at the Disney-MGM Studios Tour. It's a Disney Channel attraction, and selected guests from its audience on Sound Stage Two will have the chance to audition—and the best auditions will be selected for presentation on The Disney Channel this fall. Stay tuned for more news in an upcoming story.

COMPARING KIDS

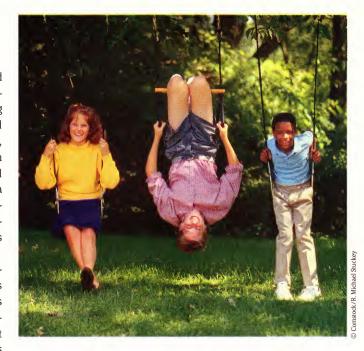

Parents everywhere have found themselves comparing their children with other kids, from asking another mother, "When did Rachel start to talk?" to probing a child, "How did Phillip do on the math test, honey?" There's a natural drive, it seems, to make sure that a child's performance—both developmentally and in terms of achievement in school, sports and life—fits in nicely with the others.

Is that drive to compare ultimately a bad thing? Should parents cringe when they hear themselves doing it? Experts say that comparing a child with others is not only normal, but in many cases may be an important way to pinpoint potential problems or to reassure a worried parent—or child.

Often it takes making a comparison in order to discover a problem, says Bernice Sedlik, M.A., a speech pathologist in Canoga Park, California. "Many parents come to us out of a pre-school setting, after they've had a chance to listen to other children talk," she says. It's in the pre-schools and Mommy-and-Me classes that '90s parents typically first find the opportunity to see other children communicate and interrelate. That, says Sedlik, is valuable.

"One mother had always had an inkling that her three-year-old daughter had a speech problem. But it wasn't until she could see her daughter next to others her age, and talk about the issue with other parents, that she could accept the problem and seek help for it," says Sedlik.

Lynn Musser, Ph.D., assistant professor of child development and family studies at Purdue University, says that what psychologists call social comparison is a common and natural thing for people to do. She says it's not bad for kids to compare themselves with other children or for parents to compare their children with

others

"You don't know how fast you can run until you race," she says. "But problems start when you expect your child to be perfect."

For the basic growth, developmental and learning milestones, Musser says that pediatricians and school teachers are excellent resources for parents. The variations of normal are quite wide, she says, and it's a good sign if the professionals aren't concerned. What gets less attention, she says, is the achievement of social behavior skills, despite the fact that the primary developmental task of preschool and elementary school children is to develop good peer relationships.

But whatever the issue, Mausser says that "the real trick is to find your child's strengths and support them."

She also advises that parents keep the big picture in mind: For example, if a child who normally does well brings home a 70 percent spelling test score, parents shouldn't worry about it. "Tell the child, 'It looks like you had a bad day. I know you can do better next time." But if the lower score becomes a trend, then talk to the teacher, she suggests.

Musser also warns parents to be

aware of their own personal motives when they compare their children to others. "We want our children to do well but we want to be careful about why: Is it so we can brag to our friends, or is it to help ensure that the children will be happy and productive?"

—Barbara Bronson Gray

TIPS ON MAKING HEALTHY COMPARSIONS

- Have concerns about academic performance or physical development checked out by a teacher or pediatrician.
- Talk to other parents. Sharing concerns will either be reassuring, or may help pinpoint potential problems.
- Don't expect perfection in your child.
- Find your child's strengths and support them.

Education

ANOTHER SCHOOL YEAR ENDED

What follows is an excerpt from *Among Schoolchildren*, the best-selling book by Tracy Kidder, about a remarkable and wonderfully human fifth-grade public-school teacher, Chris Zajac.

Near the end of a year, a teacher can't help facing the fact that there's a lot she hoped to do and hasn't done, and now probably never will. It is like growing old, but for teachers old age arrives every year. Sitting at her desk during math one hot day in June, Chris looked at Felipe and said to herself, "He hasn't mastered fractions yet. He won't do that 'til next year."

She looked at Pedro and thought she had done something for his future, at least, and maybe for Julio's, too. Contemplating Jimmy, though, the boy's head lying on sticklike arms on his desk top, she felt that the changes she had hoped to make in him just hadn't come to pass. He looked like a porcelain figure. He gazed toward the window, evidently lost in something emptier than daydreams.

... She looked at her class now and thought, "How many backgrounds they come from. How many different sets of problems. Even if I had them for three hundred and sixty-five days, would I meet them all?"...

Even the most troubled children had attractive qualities for Chris. Even the most toughened, she always felt, wanted to please her and wanted her to like them, no matter how perversely they expressed it. She belonged among schoolchildren. They made her confront sorrow and injustice. They made her feel useful. Again, this year, some had needed more help than she could provide. There were many problems that she hadn't solved. But it wasn't for

A'BEDTIME SNACK— MAYBE FOR FRIENDS AT A SLFFPOVER

Simple to prepare, and easy on the stomach, the following recipe is a good before-bed treat for kids to put together. It's also a good way to use up bananas that have sat around for too many days. You can give children the recipe below, which is written for them, complete with a note of reassurance about the yucky brown spots on overripe banana peels.

BANANA SMOOTHIE

Here's What You Need (Take out all items before beginning)

1 banana ice cubes (1-3 of them)

1 cup milk blender

1/2 teaspoon of vanilla glass measuring cup

Here's What You Do (First, read steps 1-4)

- 1.Take out the blender and pour in one cup of milk.
- 2. Peel the banana, break it in half and add to milk.
- 3. Add 1/2 teaspoon vanilla and ice cubes.
- 4. Blend for 20 seconds; pour, serve and enjoy!

The riper the banana—or the more brown spots it has on the peel—the sweeter it is and the better it is for you. Just because a banana has spots on the peel doesn't mean it has spots on the middle.

lack of trying. She hadn't given up. She had run out of time.*

Among Schoolchildren is rich with insights into the challenges and successes, as well as the disappointments, that form the peaks and valleys of one school year. In order to write this story, Kidder spent every day of an entire school year in Zajac's classroom in the Kelly School, a public elementary school in Holyoke, Massachusetts.

The book, published at the beginning of this school year, immediately hit best-seller lists and has remained there through the year. Parents and teachers who haven't yet read it will surely want to add it to their summer reading

lists, for it is a moving story that tells more about American education than any professional report ever could.

SPOILED KIDS

Whether it's a newborn crying late into the night or a 10-year-old whining and complaining at the slightest provocation, such behavior causes many parents to wonder if their children are spoiled. What do you do if your child seems to be causing others to roll their eyes in disapproval? And what can you do to prevent the spoiled child syndrome?

According to Bruce J. McIntosh, M.D., a physician at St. Vincent's Medical Center in Jacksonville, Florida, and author of a recent article on the topic in *Pediatrics*, there *is* such a thing as a spoiled child, although the term has been avoided in the last child-rearing decade or so because it has had a derogatory connotation.

"A spoiled child acts in a self-centered way because his parents haven't enforced ageappropriate limits to help him act his age," McIntosh says.

Unlike other behavior problems of child-hood, which are *not* induced by parents, the spoiled child's behavior, McIntosh observes, really is attributable to parental behavior. But

it's the result of the parents' lack of action and consistency, rather than from parents lavishing gifts or attention on the child.

The issue is one of consistent discipline, not indulgence, McIntosh points out. "It's O.K. to give liberally of your time and even gifts," he says, "as long as follow-through, rules, limits and expectations are clear."

In disciplining children, McIntosh encourages parents to use behavior modification techniques mild enough for parents to use *every* time it's needed. That's what makes the system effective.

McIntosh says using a "time-out" approach for discipline works well, putting the child in a corner or on a chair—for one minute per year of age, five minutes at the most. Use a kitchen timer, he says, and be sure to tell the child what it was precisely that he did wrong. After the buzzer, don't discuss the wrongdoing.

What about babies? McIntosh says that somewhere around three months of age, the behavior of a baby suggests an ability to manipulate his environment. Cries don't necessarily relate to hunger or other needs, and can be a ploy for more attention.

But it's often hard for parents to determine whether a baby is just being a baby, or is actually asking for more than is reasonable.

(Continued on page 12)

TIPS ON USING BEHAVIOR MODIFICATION

The principles of behavior modification were developed by behavioral psychologists E.L. Thorndike and B.F. Skinner, and the basics are simple:

- Be consistent. If you don't want your child sipping grape juice in the living room, say so *every* time. Stick to your rules.
- Have rules, and make sure they are well understood. Dr. McIntosh suggests these: No hitting; be nice to others; respect the rights of others; don't whine; do what your parents tell you. These rules, McIntosh says, are cross-cultural.
- Ignore whining and tantrums. If they don't work, kids will stop using them (eventually); if they are effective in getting children the attention they want, they'll increase.
- The purpose of punishment is not to make the child suffer but to teach him or her the limits of acceptable behavior. It is not the severity, but the consistency of the punishment, that helps the child learn the rules.
- Reward the behavior you'd like to see repeated. Even saying, "I really like the way you just..." will help reinforce the good behavior.

READINGS

Rembrandt Takes a Walk Story by Mark Strand Illustrations by Red Grooms (Clarkson N. Potter, Inc.; \$14.95)

An acclaimed poet and an acclaimed artist join forces in a picture book that will delight the young while tickling the fancy of older kids. Young Tom visits his eccentric Uncle Mortimer, an art collector, and undertakes some wild adventures in art.

SCHOOL REPORT

As of this spring California parents can check up on their children's schools, thanks to approval of Proposition 98, the country's first voter initiative for education, which requires every public school to keep on file a report card evaluating itself on 13 items, such as drop-out rates, test scores, expenditures per student, and condition of school facilities.

After three months, a baby who is not sleeping through the night, says McIntosh, is a "trained night crier," and parents should realize that it's unreasonable for babies to make this midnight madness part of the family life-style.

The goal is to teach the baby that he can let himself go to sleep; the trick is to help him learn to do this without needing to be rocked, fed or cajoled. McIntosh suggests either a cold-turkey approach (peek in and check the crying baby, and come back 15 minutes later, but know that the infant may cry up to three or four hours the first night) or a debriefing (go in the room, keep the light off, pat, but don't pick up, the baby).

"At three months, it's not too early to begin to let the child know he has limits, and to do so consistently," McIntosh says.

Kids need to learn limits.

Parents who lack confidence, time or energy to meet their child's complex developmental needs (and what parent doesn't at one time or another?) run the greatest risk of spoiling their children, says McIntosh. The risks of spoiling are more severe than chronic whining and frequent tantrums. Says McIntosh, "There is no upper age limit on being a spoiled child; some will carry this pattern of behavior into adulthood."

Activities WRITING YOUR FAMILY'S HISTORY

If older relatives are constantly reminiscing about the good old days, why not preserve their stories by writing a family history and making copies for your younger relatives? Family histories should be more than dull pedigree charts. You will want to include anecdotes about your ancestors; pictures of family heirlooms such as great-grandmother's quilt; family portraits; family recipes; or details about family traditions and family rituals. Tape recorders are invaluable in collecting information and enable children to participate in the process.

There are several good sources to give you the information you need to write and self-publish your family history.

Writing The Family Narrative by Lawrence P. Gouldthrup (Salt Lake City: Ancestry Inc.) is a clear, concise manual that takes you step-by-step through the procedures for gathering material to create a coherent narrative.

Writing Family Histories and Memoirs by Dennis Stovall (Media Weavers Inc., Route 3 Box 376, Hillsboro, OR 97124) describes such genealogical research methods as the use of family reunions to gather anecdotes and information, and gives tips on how to handle such tricky problems as family feuds or the privacy rights of family members.

Tracing, Charting and Writing Your Family History by Louis M. Skalka (New York: Pilot Books) is a concise guide to researching and writing such a book.

Families Writing by Peter Stillman (Cincinnati, Ohio: Writer's Digest Books) offers 50 activities that will help your family record special moments, share stories and preserve family memorabilia.

If you want to combine a family history with a family cookbook,

"Reunion Recipes" (free from Better Homes and Gardens Magazines, P.O. Box 10237, Des Moines, IA 50336) includes tips on gathering together family recipes, and on designing the cookbook and getting it printed.

Creating a family history is an activity shared by all ages.

Photography for Genealogists by Wilma Sadler Shull (Salt Lake City: Ancestry Inc.) shows you how to use your camera to add visual interest to your written family history. Topics include copying historical photographs, photographing family heirlooms, and photographing library documents. Copying Historical Photographs: Equipment and Methods (American Association for State and Local History Technical Leaflet no. 139) supplements this information.

Nutrition DO YOUR KIDS NEED VITAMINS?

In a world in which kids are fussy eaters and dinner often means fast food, it should be no wonder that for many, daily vitamins have become a regular routine of childhood. But are they necessary?

According to experts, very few children in our society have symptoms of vitamin deficiency. Says John Udall, M.D., Ph.D., associate professor of pediatrics at the University of Arizona Health Sciences Center and a member of the American Academy of Pediatrics Committee on Nutrition, "If a child is growing and developing normally, the likelihood is that the child doesn't need any vitamin supplementation."

Yet parents feel uneasy as they watch their three-year-old eat

nothing but peanut butter and jelly for three days straight. And they worry about the health of their 12-year-old, knowing that he is so anxious to get out on the playground at lunch that the shiny red apple is the first thing to be slamdunked in the trash. So it seems important to spring for multicolored cartoon character vitamins promising that elusive 100% minimum daily requirement.

For babies, the issues are different. Infants who are exclusively breast-fed for the first six months of life and are unlikely to be exposed to sunlight during the winter may need extra vitamin D, says Udall. And for pre-term (premature) babies, a multivitamin is usually recommended, he adds.

Depending on whether fluoride is added to the water supply, a fluoride supplement to strengthen tooth enamel may be recommended by a child's pediatrician or dentist.

"A healthy-appearing child probably doesn't need any supplementation," says Udall. "Yet there's nothing wrong with giving a multivitamin preparation in the recommended dose. If you have more than you need, the body will eliminate the water-soluble vitamins in the urine and will store the fat-solubles," he explains.

For parents who are concerned about whether their children's diets are adequate, family health books, federal government publications, and even cereal boxes list recommended daily allowances of vitamins and minerals.

Terry Fletcher Hatch, M.D., associate professor of clinical pediatrics at the University of Illinois College of Medicine, suggests that, even though children don't develop vitamin deficiencies by not getting a vitamin on a given day—it takes days or months—parents can give their children a vitamin on the "bad eating days." It's more cost-effective, he says, than giving vitamins every day, and at the very least, "it makes the parents feel much better."

Remembering Marilyn NORMA JEAN, NORMA JEAN

In May, The Best of Hollywood presents four comedies from Marilyn Monroe's first successful period in pictures (1952-1955). The films are *Monkey Business* (1952), *Gentlemen Prefer Blondes* and *How to Marry a Millionaire* (both 1953), and the classic *The Seven Year Itch* (1955). Her costars include Cary Grant, Ginger

Rogers, Jane Russell, Lauren Bacall, Betty Grable and Tom Ewell. (In addition, Mystery Night will present Niagara with Monroe and Joseph Cotten). The Seven Year Itch marked the end of the first phase of Monroe's career: it was the year that saw the collapse of her marriage to Joe DiMaggio and her public vow to quit Hollywood for New York to study with Lee Strasberg at the Actor's Studio, promising to become a serious and respected actress. Norma Jean made good on that promise-yet her life was already moving from stardom to tragedy.

Jean Shepherd HUMOR, AMERICAN STYLE

"I hate nostalgia," claims noted American humorist Jean Shepherd. "It's an American sickness to believe that there used to be a better time. It's all a myth...there never were any good ol' days, just days."

Shepherd's sneering attack on nostalgia aside, subscribers will find Shepherd's Disney Channel Premiere Film, *Ollie Hopnoodle's Haven of Bliss*, which airs in June, to be a witty and sardonic look back at family vacations in the '50s. It's a special encore engagement for the 1988 feature, which stars Dorothy Lyman, Jerry O'Connell, and James B. Sikking (*Doogie Howser, MD*) as the family's weary "Old Man."

CHARLTON HESTON: THE CLASSIC FACE

Generals and prophets, emperors and kings. These are the roles often associated with Charlton Heston. After 40 years in show business and over 50 films to his credit, Heston still feigns ignorance when it comes to explaining his penchant for playing characters of historic import. "I don't know why," he confesses, "but I seem to have a face that belongs to any century but my own."

Indeed, Heston's chiseled features and aquiline nose won him many a great role. While researching *The Ten Commandments* in 1954, director Cecil B. De Mille noted Heston's remarkable resemblance to Michelangelo's statue of Moses in the Vatican—and cast

Heston in that very part.
Physical attributes aside,
Heston has a rare gift for

creating imperious characters while still eliciting empathy from his audience. It was this exact mix of authority and vulnerability that attracted him to the role of James MacKenzie in the upcoming Disney Channel Premiere Film *The Little Kidnappers*.

"The grandfather is a marvelous role—a firm Scots patriarch," Heston explains. "In many ways I modeled him after my own great-grandfather, who was known to be quite an authoritarian figure." With a revealing grin he adds, "Many of these stern, Mosaic men conceal a great deal of passion."

Mystery Night ORSON WELLES, BOY WONDER

At 23, Orson Welles convinced Americans they were being attacked by men from Mars. Three years later, he shook Hollywood with *Citizen Kane*, his feature film debut. And though Welles's career would be irreparably damaged by Hollywood's accusation that he was "box-office poison," he went on to create some of the greatest scenes in the history of film.

A number of those scenes are on view in June when Mystery Night (every Tuesday at 9:00 p.m., Eastern/Pacific time) presents three Welles classics: *The Third Man, The Stranger*, and *The Lady from Shanghai* (the latter two with Welles as actor and *auteur*). And what powerful scenes there are, from the climactic shoot-out of *The Lady from Shanghai* to the moment in *The Third Man* when Welles, as Harry Lime, comes face to face with his dark destiny.

"Once you've stepped out of bounds, away from a certain life, once you've changed, you can't pretend you haven't," says Hayley Mills. Mills is speaking of her role in the new Disney Channel Premiere Film *Back Home*, a sensitive drama about a British family reunited after the Second World War. Mills portrays Peggy, who must help her family—and especially her daughter—readjust to life in an England irrevocably altered by war.

"It's a wonderful, unusual premise for a story," Mills says. "A child, Virginia—Rusty is her American nickname—gets evacuated from her home in England to the United States at the beginning of the war. She was far away from her family, which was hard, but she didn't have to struggle with the problems that the war brought. She grew up in a peaceful environment. But she faces a contrast and a conflict in her life when she returns to England five years later. Now Rusty has to find a way to live, both with her family and with a new England. And this really happened after the war. England was never the same again."

"Walt Disney once said, 'I don't make shows for children; I make shows for everyone,' and I agree with that," says Shelley Duvall, executive producer of the Disney Channel Premiere Film *Mother Goose Rock 'N' Rhyme*. Duvall also stars as Little Bo-Peep, who searches Rhymeland for the missing Mother Goose, running into a cast of outrageous characters including Garry Shandling and Teri Garr as Jack and Jill, and Cyndi Lauper and Woody Harrelson as Mary and her lamb.

How did Duvall, known for her roles in *Popeye* and *The Shining*, get into producing fairy-tales? "I was

(The late Laurence Olivier, for example, writes about Bette Midler, with McDowall's photo of La Midler as illustration.)

McDowall took up photography after he was dropped by MGM Studios in the '50s. "It took eight years for anyone to take me seriously," McDowall says. "You're not supposed to do anything else apart from what you're known for. Then suddenly people wanted to print my pictures because I was an actor." McDowall quickly proved he was not just an actor who could take pictures, but a master photographer with a superb eye and feel for his subjects.

Fraggle Rock AN ANIMATED SERIES FROM JIM HENSON

"Fraggle Rock is a world just beyond everyday reality," says Jim Henson of his animated series, which premieres in May on The Disney Channel. This weekend morning show, which airs at 9:00 a.m. (Eastern/Pacific time), uses the wonders of animation to bring a new reality to Henson's acclaimed characters.

"Animation opens up whole new worlds of the imagination," Henson points out. "We can take our characters anywhere we want -with animation there are no boundaries."

Fraggle Rock chronicles the adventures of the five Fraggles-Gobo, Red, Mokey, Wembley, and Boober-who live in a fantastic world that's found tucked behind a hole in the baseboard of an eccentric scientist's (named Doc) workshop. Also populating the world of Fraggle Rock are the tiny, industrious Doozers and Ma, Pa, and Junior Gorg, gigantic creatures with the outlandish belief that they rule the world. One other favorite recurring character is Gobo Fraggle's uncle, Traveling

Matt, an explorer who roams "Outer Space," the world beyond Doc's workshop, known to parents as the "real" world.

Fraggle Rock uses Henson's patented blend of humor, intriguing and engaging characters, comic situations and original music to point a moral and adorn a tale: in this case, teaching young viewers about living in harmony with people different from themselves. It all makes for a half-hour of laughter and learning.

It's highenergy drama as Spano tracks down the criminal.

Spano is deliberate in choosing his parts. "There has to be something that says to me 'I hope to get a chance to bring this character to life," he notes. In-between roles, Spano is a budding screenwriter -he's just finished a script that uses hockey as a backdrop.

Who Framed Roger Rabbit was the top-grossing film of 1988. The Touchstone/Amblin detective comedy earned more than \$154 million domestically, and an additional \$174 million overseas. Yet one of the key moments in the creation of the hit film occurred when two of its principle architects, director Robert Zemeckis and animation director Richard Williams, met at the St. James Club in London and agreed that films combining live-action and animation don't work.

"...I was convinced every rule about the use of animation and live-action was baloney..."

—Animation Director Richard Williams (below)

"I said, 'I hate combination films: The cartoon cancels out the live-action and the live-action cancels out the cartoon, and you can't believe in either one. They embarrass me," recalls Williams. "Bob agreed—which threw me—then started talking about the sophisticated work the artists at ILM (George Lucas's firm Industrial Light and Magic) had been doing with special effects and blending media."

As the discussion progressed, the two men discovered what they really disliked were a set of conventions restricting combination films. Although blending animation and live-action is difficult and time-consuming, mixing media has been a standard technique since the 1920s, when Koko the Klown bedeviled Max Fleischer in the *Out of the Inkwell* series. (The practice goes back even further: Emile Cohl experimented with combining media around 1908.)

Because an error as slight as the thickness of a line can make the difference between a cartoon character touching an actor's hand and seeming to pass through it, filmmakers worked to simplify the process over the years. Even in the most successful combinations—Gene Kelly's duet with Jerry the Mouse in *Anchors* Aweigh or Dick Van Dyke's dance with the penguins in *Mary Poppins*—the actors and cartoon characters rarely touch each other. There are no trucks, pans or other camera moves during these scenes, to avoid the problems of trying to match the shifts in perspective in the animation.

Williams and Zemeckis believed the lack of interaction between the characters weakened the illusion of the cartoons and humans living in the same world, and prevented the necessary suspension of disbelief. Keeping the camera static made the resulting film look stodgy and old-fashioned.

"There were all these rules to make it easier for the animators, so they could go play tennis or something," continues Williams. "I told Bob I was convinced every rule about the use of animation and live-action was baloney, and that if we were to do it, I wouldn't provide any rules. We'd throw out the locked-down camera and shoot a modern movie: He could turn the camera as much as he wanted and we'd just draw the characters in there."

Their first project was a short test film of Roger in a dark alley: The results looked so

AN ANIMATED HERO FOR THE '90s?

Roger Rabbit has proved so popular that he has joined Jiminy Cricket and Tinker Bell in the elite group of characters from Disney animated features who have appeared in other films. One year after the premiere of Who Framed Roger

Rabbit, the nutty bunny returned to the screen in Tummy Trouble, the studio's first animated short in 25 years. Many critics believe that its presence on a de facto double bill helped Honey, I Shrunk the Kids gross over \$130 million.

"I don't think Disney has created a character of the magnitude of Roger in the last 30 years — a character who jumps off the screen into people's laps," says Peter Schneider, Disney's senior vice-president of feature animation. "Honey is a very strong, suc-

cessful movie in its own right, but its entertainment value is enhanced by the Roger cartoon."

Director Rob Minkoff and his crew of artists had to duplicate the lavish style of the hit feature in a fraction of the time and with a fraction of the budget.

"We had a twofold job to do," says animator Tom Sito, who worked on both films. "We wanted to show the audience the same old Roger, with no compromise in quality or taste,

Roger and Baby Herman in the 1989 short Tummy Trouble.

but we also wanted to delve into his character more deeply."

James Baxter, who animated the opening sequence of Roger talking to Baby Herman's mother and fumbling in her purse, agrees: "The

business with the purse was my idea: The sequence gave me a chance to do some pantomime with the character. Instead of spouting off left, right, and center, he was doing something that would make him feel a genuine emotion — em-

barrassment about trying to get into her purse. It was just a little throwaway thing I could put in there."

A second Roger cartoon, Roller Coaster Rabbit, will debut with Dick Tracy late this spring. Minkoff also directed the new short, but worked with a different crew at the new Disney animation studio in Florida. Although the animators enjoy making them, it's not certain whether any additional cartoons will follow Tummy Trouble and Roller Coaster Rabbit.

"We have a couple of ideas we're

working on, but we haven't decided whether or not to continue producing them," explains Jeffrey Katzenberg, chairman, The Walt Disney Studios. "That's something we have to decide with our partners at Amblin."

good, Williams said, "it married Disney and Amblin." He moved out of his Soho studio to the newly established headquarters of Disney Animation UK Ltd. in the Camden Town area of London. Young animators from all over the world began arriving to work on the film.

"When we started talking to Richard, he said, 'I like to keep things small-we'll do this with maybe four or five animators,"" says Peter Schneider, senior vice president, feature animation, Walt Disney Pictures. "We ended up with 300 people working in London, and a second unit in Los Angeles."

The basic technique used in Roger was essentially the same one the Fleischer artists developed for the Inkwell shorts, half a century earlier. Each frame of live-action footage was printed as a 10 1/2" by 12 1/2" photostat. The animators

used the stats to match their drawings to the movements of the human actors. Because Zemeckis used a hand-held camera in many scenes, the point of view shifted slightly from frame to frame, making it extremely difficult to keep the characters correctly registered, even when they were standing still.

only come in contact with the ground for a few frames," explains supervising animator Andreas Deja. "But when the character is standing there and the hand-held camera is moving up and down and in little circles, it's just about impossible to lock him onto the ground-

a live-action prop as an anchor. He

discovered that if he kept Roger exactly the same distance from, say, a bucket on the floor in every drawing, the Rabbit seemed to stand still while the camera moved around him.

"Having the camera constantly moving at such a subtle pace was scary at first," agrees

Bob Hoskins and Roger with director Robert Zemeckis.

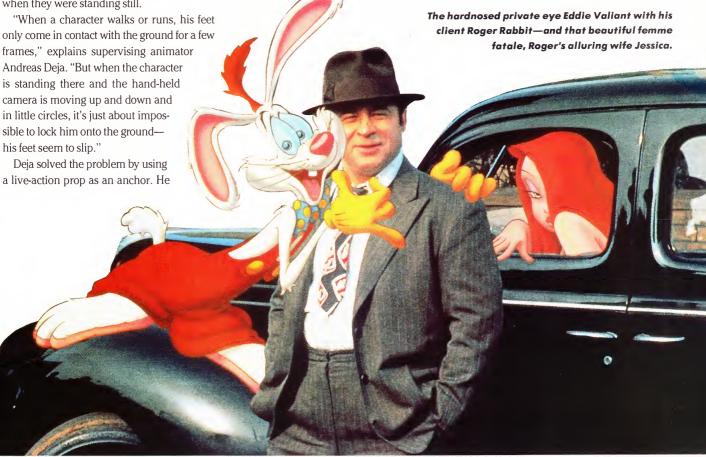

animator Dave Spafford, who did the film's piano duel scene between Donald Duck and Daffy Duck. "But it helped keep the characters alive. If the live actor is standing still and the camera is locked down, the separation between the cartoon character and the actor becomes obvious, and the animation can go dead. But when the camera's moving, it covers up that separation."

Character animation is the art of making a cartoon figure move with an individual style

> that expresses his unique personality: No two humans walk exactly the same way, and neither should any two cartoon characters. An essential part of an animator's job is timing a character's motions so he appears to be acting on his own volition. But for Roger Rabbit, the characters' movements had to be matched to the live-action.

> "The live-action had been shot before we began animating, which presented unique demands for staging the timing," says Tom Sito, who drew Judge Doom's weasels laughing themselves to death. "If

Eddie Valiant hit a weasel and the weasel fell and hit a table, Bob Hoskins would do the gesture and the prop table would collapse. We had to match our animation to those actions and still make it look spontaneous."

Judge Doom threatens Roger with the "dip." **Combining Toons** with real actors meant that the animators "had to match our animation with those actions and make it look spontaneous." Work by Industrial Light and Magic also gave animation cels extra depth, making Toons appear as three dimensional as their co-stars.

"We did this the old-fashioned way, drawing it by hand. It's our hommage to the great animators and directors whose work we grew up on."

—Animator Tom Sito

One of the high
points in blending
two mediums:
Jessica, complete
with spangled dress,
wows Eddie Valiant at
the notorious Ink
and Paint Club.

After the animation had been completed, the drawings were traced and painted onto cels, which were photographed. Crews at ILM used optical printers to combine the animation and live-action. To heighten the illusion that the actors and cartoon characters inhabited the same world. ILM crews shot at least three cel levels of shadows and highlights for each character in every frame. (Additional work was required for special effects, like the sparkles on Jessica's gown when she sang "Why Don't You Do Right" in the Ink and Paint Club.) To simulate the soft edges of real shadows, the cels were shot out of focus and underexposed: The shaded areas were built up in layers, like the tones in a watercolor painting.

This time-consuming process produced a remarkable illusion of solidity. When Jessica tugged Eddy Valiant's tie or Roger held his hand, the audience felt that two round, threedimensional characters were engaged in an action, rather than a three-dimensional human and a flat cartoon character.

Roger Rabbit was produced under tight security. No reporters were allowed to visit the live-action sets or the animation studio in London. The use of state-of-the-art, computer-controlled equipment at ILM led to rumors that animation for the film was being done by computer—a rumor that infuriated the artists who worked on the film.

"If anybody says this film was done with computer animation, there's going to be trouble," declares Sito. "We did this the old-fashioned way, drawing it by hand, frame by frame. It's our *hommage* to the great animators and directors whose work we grew up on."

Literally hundreds of artists worked on an often frenetic schedule to make *Roger Rabbit*. By the time the film opened, associate pro-

WORKING WITH FAMOUS ANIMATED CHARACTERS

Ordinarily, animators invent an appropriate style of movement for a character, one that reflects his personality. But Who Framed Roger Rabbit featured some of the most famous characters in cartoon history: The audience would expect Mickey Mouse, Bugs Bunny and the rest to move the way they did in the classic shorts. The artists had to adapt their well-known walks, gestures and expressions to new situations. It was a bit like asking an actor to play Laurence Olivier, rather than Hamlet.

"The key was research," explains supervising animator Andreas Deja. "The characters changed over time, so we had to decide which version was most suitable for the film. For example, the best Mickey shorts are from the late '30s and early '40s: Brave Little Tailor, The Pointer and Mickey's Parrot: Mickey changed after that and became a different mouse. Roger Rabbit was set in the mid-40s, so we couldn't use a version of a character from after 1945."

The artists analyzed old cartoons as carefully as athletes studying training films. Animator Mark Kausler, who worked with Droopy, Tex Avery's phlegmatic basset hound, agrees

that the research paid off.

"Droopy was kind of a challenge," he recalls. "My first stuff had too much action in it. I studied the films and discovered the best Droopys have the least movement. He tends to move quickly when he does move, but the movement is mainly in the mouth and eyes, and the way the ears overlap when he turns his head."

The fact that these characters were well known also provided shortcuts. The artists didn't need to invent personalities for these characters: The previous generation of animators had already done it.

"It makes a big difference when you have a framework already established and you don't have to start from scratch," says Deja. "You don't have to do a lot of rough animation to refine these characters—they've been refined and polished over the years: We grew up knowing and liking them. It was fun to be able to take the Hippo and Ostrich from Fantasia and give them this little encore."

Kausler summed up the animators' attitude when he concluded, "The past was not a burden on the film: We were having fun with the past."

"It was fun to be able to take the Hippo and Ostrich from Fantasia and give them this little encore."

—Supervising Animator Andreas Deja (above)

ducer Don Hahn described himself as "suffering from 'Post-Roger Syndrome'" and jokingly compared the animators to war veterans who get together to swap stories ("we'll probably be marching in parades soon"). Yet everyone who worked on *Roger* was eager to work on a similar project—a wish that may soon be fulfilled.

"There is a sequel in development," confirmed Jeffrey Katzenberg, chairman of The Walt Disney Studios, in a recent interview. "We have a story we're working on, and a script is in the works. The film is actually a prequel, and we hope to start production in early 1991. We figure it will take about two years to make, so it will probably be released around the end of 1993."

With the benefit of hindsight, it's easy to say that *Roger Rabbit* had a ready-made audience: Members of the Baby Boom generation who had grown up watching old theatrical cartoons on television would be sure to flock to a sophisticated film that evoked the classic animation of the post-war Warner Brothers and MGM shorts.

But during the '70s and early '80s, animation had acquired a reputation as box office poison. In America, the medium had been stigmatized

by the often mindless children's programming on Saturday morning. For all its technical brilliance and financial success, the greatest contribution *Who Framed Roger Rabbit* may have made to the art of animation is the destruction of the pernicious shibboleth that animated films appeal only to small children.

"More than anything else, I think *Roger Rabbit* has legitimized animation for this generation again," concludes Schneider. "It's established animation as a legitimate art form in the eyes of a broader public: We're being taken seriously as filmmakers, and people are starting to talk about animated films seriously. Our policy at Disney for the last five years has been that animation is a serious art form that can be used to make great movies. *Roger Rabbit* has helped that idea gain widespread acceptance, as has a string of good animated pictures, including *The Little Mermaid*, *The Land Before Time*, *An American Tail*, and *Oliver and Company*."

An internationally noted critic and historian of the medium, Solomon is the author of Enchanted Drawings: The History of Animation (published by Alfred A. Knopf), which was nominated for a National Book Critics Circle Award.

Who Framed Roger Rabbit premieres Friday, June 1, at 7:00 p.m. (Eastern/Pacific Time).

Who Framed Roger Rabbit also airs: **June 6, 23, 29**

PAUL OLO

Sunday Night Showcase

presents an intimate

portrait of one of

America's most

gifted songwriters

By Dave Marsh The curse of Paul Simon's career is that, even though he's perhaps America's most gifted popular songwriter of the rock era, and one of its more rhythmically adventurous, he'll forever be best known for the sweet ballads and Sixties poesy of Simon and Garfunkel. Yet Simon and Garfunkel lies far from the center of Paul Simon's music. That duo lasted only five years, while Simon's solo career is entering its twentieth. And, even though *Graceland* is his only solo album that can compete with "Bridge Over Troubled Water" and "Mrs. Robinson" and "The Sounds of Silence" on the royalty ledgers, by any measure *except* record sales, it's Simon's solo years that have been most productive and creative.

Despite the long shadow cast by Simon and Garfunkel, the special *Paul Simon: Solo* centers immediately on Simon himself, and never deviates from its mission: An in-depth exploration of a remarkable songwriter's career. Mark Steyn, the program's British producer/interviewer, operates from the crucial (and correct) assessment that it's the songs Simon's written during those solo years—"50 Ways To Leave Your Lover," "Still Crazy After All These Years," "Mother and Child Reunion," "Kodachrome," "Me and Julio Down By the Schoolyard," "You Can Call Me Al" and all the restthat provide the best lens through which you view even Simon and Garfunkel. It's a thesis Steyn pursues unfailingly, and that Simon, probably glad of being relieved, for once, of explaining why he and Garfunkel were never creative equals, eagerly follows.

Not that the show slights the rest of what Simon's done. Indeed, his life and music are traced as far back as the grocery store parking lot where he first heard Elvis Presley. In fact, much of the interview footage comes from a leisurely afternoon's drive through Forest Hills, the outer borough New York City neighbor-

hood where Simon and his grade school chum, Art Garfunkel, grew up. (The rest derives from sessions at Simon's Montauk summer home and at his office in the music industry's storied Brill Building.)

Though Simon insists, "There's really not that much difference between my life and anybody else's life," what emerges is anything but the usual "Poor Boy Makes Good" profile. Simon's roots were in middle-class America, far closer to Ricky Nelson's than Elvis's. His keen interest in music was no surprise: Louis Simon, his father, was a bassist for orchestras on the Arthur Godfrey and Jackie Gleason shows; his mother, Belle, was a music teacher; his younger brother, Eddie, runs a New York guitar school. His fondest memory of his best school friend, Arthur Garfunkel, whom he met in fourth grade, is as "the kid who sang in the talent show."

Just as Paul Simon is nothing like the typical rock superstar—the flashiest scene here features him mocking his own pretensions by wearing a turkey costume in his role as Mr. Alienation, the host of a Thanksgiving edition of *Saturday Night Live—Paul*

Graceland attained: Simon with his 1987 Grammy for Best Record.

Simon describes rock history in terms of sounds and rhythms. He focuses less on the flashy performers than on the sustaining ones, nominating the Beach Boys, the Beatles and Bob Dylan as early Sixties creators who made "culture that was real."

Simon: Solo is nothing like the typical rock TV program. The show presents a lot of music but few full performances. Instead of being organized as a concert, its focus remains on Simon throughout, both his personality and the ways in which he creates the songs. No one has ever done so much with the bare bones of the songwriting process—Steyn even gets Simon to show off and explain the legal pads on which he wrote, over a period of several months, successive versions of the 1983 song "Hearts and Bones." Simon also speaks frankly about Graceland, the criticism he faced for recording it in South Africa, and his penchant for working with Third World and black American musicians: His solo career began with reggae sessions in Jamaica; he recorded his second album with black gospel groups; and he's currently working on an album based on sessions conducted in 1989 in Brazil.

In this context, Simon is even willing to offer a full accounting of Simon and Garfunkel's early career as the pseudo-Everly duo Tom and Jerry, who hit with the Simon-penned "Hey Schoolgirl" in 1957, when they were just 16 years old. Simon goes even further back, playing a brief acoustic rendition of "The Girl For Me," the first song he ever copyrighted, in 1955. Because he's as analytical as any performer rock has ever known, Simon ably connects what he heard on Alan Freed's radio show back then to his adult interest in rhythm and harmony from all over the planet. "I don't know that I've had a really new idea since the Sixties," he says, not without some pride in how good those early ideas were.

He also carefully outlines what distinguishes his work from his Tin Pan Alley predecessors, men like George and Ira Gershwin and Irving Berlin, who wrote songs mainly as melodic devices for others to embellish in performance. "I think good songs are about sound," Simon says. "If you're writing a song that's telling a story, you listen to the sound. And it's the sound that tells you whether to stay within the rules or break them."

Simon explains in some detail how the cohesiveness of his various rhythm sections has played the greatest role in the relative commercial success or failure of his own albums. "If a song has deeper meanings, it's all right as long as the track is accessible," he says, and his examples of how that works range as far back as the Fifties. And he separates the inspired

amateurism of his Tom and Jerry days from the more professional rock-era songwriters operating out of the Brill Building, "the building you would get scared to go to."

In a sense, then, *Paul Simon: Solo* offers the singer-songwriter's unique version of rock & roll history. Simon has described hearing Elvis as "a gigantic cultural earthquake," but he also told me, "When I saw Elvis Presley for the first time, I thought, 'I could never do that.'" That comment is unique among rockers; almost all the others, from John Lennon to Jon Bon Jovi, hoped to become what Elvis was. But Simon describes rock history in terms of sounds and rhythms. He focuses less on the flashy performers than on the sustaining ones, nomi-

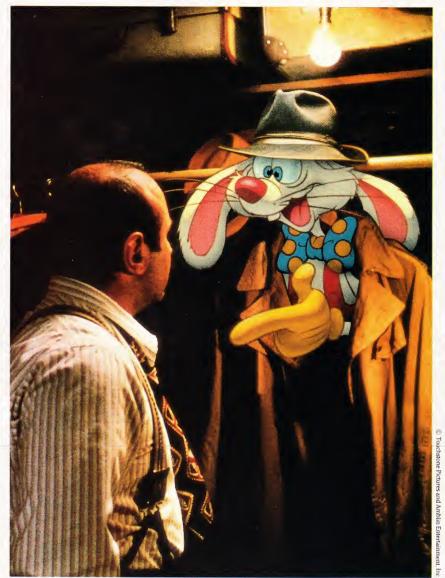

nating the Beach Boys, the Beatles and Bob Dylan as early Sixties creators who made "culture that was real."

But if he were only attuned to sounds, Paul Simon would not be a major musical artist at age 49. Although Simon is reluctant to make overtly political statements, preferring instead to work with intensely personal metaphors, interviewer Steyn, emphasizing the continuity between Simon and Garfunkel's "American Tune" and his recent material, does draw Simon out a bit. Simon acknowledges his concern about "a vision of America that doesn't include minorities equally," and his disappointment "that that's the way things are today."

On the other hand, despite Simon's reputation for self-importance (which led to that immortal *Saturday Night* bit) he's also willing to deflate his own songs. "Me and Julio," he claims is nothing more than "a fantasy song. I'm not sure it means anything."

So the Paul Simon who emerges from these interviews is a man and a musician who is determined to pursue the "culture that flows like water," wherever it may lead him. What separates him from the majority of his peers is his willingness to simply entertain and his comfort with larger ideas as well. That's why he's capable of following a flop song about a surrealist painter ("Rene and Georgette Magritte With Their Dog After The War") with a hit album made with an a cappella South African gospel group. And it's why he's worth getting to know in the intimate detail offered by *Paul Simon: Solo*.

"Gessica"

She's as Precious as She Can Be...

retty as a picture and sweet as can be, Daddy's little girl delights everyone she meets. With her shy expression and delicate features, she almost takes your breath away. "Jessica" is all dressed up to visit you in her favorite print dress, ruffled bloomers, and lacy white hat.

Celebrated doll artist Connie Walser Derek created "Jessica" exclusively for The Hamilton Collection. Under Ms. Derek's care. "Jessica" has emerged as a masterwork following the rich and longstanding art tradition of the French doll companies Bru and Jumeau, who raised doll making to an art form in the mid-1800's. Ms. Derek has combined craftmanship with personality and appeal to create an adorable doll that is sure to win your heart.

To capture the innocent charm of "Jessica," Ms. Derek's original sculpture served as the model for the creation of master molds used to hand-cast her porcelain arms, legs and head. Each "Jessica" doll is exquisite in every detail ... from her big,

blue eyes and delicately blushed cheeks to her tiny hands that rest together so perfectly.

"Jessica's" cheeks, palms, and fingers are subtly blushed to match the delicate coloration of a baby's soft skin. Ms. Derek chose just the right shade of pink for "Jessica's" pouty mouth, highlighting the curves in a darker shade. And, "Jessica's" big, blue eyes are framed with real eye lashes.

"Jessica's" outfit is generously adorned with ruffles and lace, just like a

baby's. Her pink print dress is trimmed with lace and topped with an embroidered, crisp white pinafore accented at the shoulders with pink bows. Rows of embroidered ruffles trim "Jessica's" starched, white bonnet and her pink shoes are trimmed in lace and have "pearl" buttons ... perfect complements to her dress.

And "Jessica" is poseable—you may display "Jessica" on your favorite chair or table, or even in a cradle, for she has been custom-created to sit up or lie down. Every detail of her craftsmanship is flawless: from her skillfully painted porcelain face, arms and legs to her ribbon-trimmed pinafore.

And now "Jessica" can join your family for only \$155.00 (plus \$3.60 shipping and handling), payable in five equal monthly installments. What's more, The Hamilton Collection 100% Buy-Back Guarantee allows you to enjoy this doll for up to 30 days before deciding whether to keep her. So don't delay: invite "Jessica" into your home today!

An enchanting porcelain collector doll re-creating a classic Saturday Evening Post cover by

Norman Rockwell THE SAMPLER

Norman Rockwell...no other artist captured the everyday pleasures and pastimes of American life with such warmth, charm and sincerity. Now, The Sampler, one of Rockwell's most unforgettable Saturday Evening Post covers, comes magically to life as a porcelain collector doll - officially authorized by The Saturday Evening Post...and issued exclusively by the Danbury Mint.

A doll that epitomizes the character and charm of Norman Rockwell's art.

The scene is a charming, oldfashioned reminder of a simpler time...when women devoted themselves to home. hearth, and the domestic arts. Like the demure young lady depicted in Norman Rockwell's memorable 1924 cover, the doll is busy with needle and thread, happily absorbed in the creation of her "sampler."

Her remarkably detailed accessories include an upholstered chair, quilted velvet cushion, wicker basket with yarn, and a wooden embroidery frame.

Crafted of fine bisque porcelain...sumptuous hand-tailored costume.

Renowned doll sculptor, Judy Belle, has created an exceptionally appealing doll. The Sampler is meticulously crafted of fine bisque porcelain, then delicately painted by hand. Her authentic 1850's costume is hand-tailored of lace and ruffles, lavishly trimmed with green velvet ribbon. Lace-ruffled pantalettes, white lace stockings and black slippers complete the ensemble. The doll also comes with remarkably detailed accessories...a painted brooch, upholstered chair, wooden embroidery frame, and much more!

Attractively priced... satisfaction guaranteed.

The Sampler is affordably priced at \$175 — including all accessories as shown — payable in five monthly installments of \$35 each. To reserve your doll, send no money now. Simply complete and return the Reservation Application. The Sampler is a stunning heirloom collector doll you'll display with pride in your home. Mail your Reservation Application today!
